

Increase Student Achievement through Writing!

The award-winning MY Access!® instructional writing program provides a fun, interactive learning environment for students in grades 4-12. Web-based, MY Access! offers anytime, anywhere access for students, teachers and administrators. Comprehensive instructional support for educators, unmatched accuracy in scoring writing assignments with IntelliMetric®, and unlimited opportunities for students to write, revise and learn make this an indispensable classroom tool!

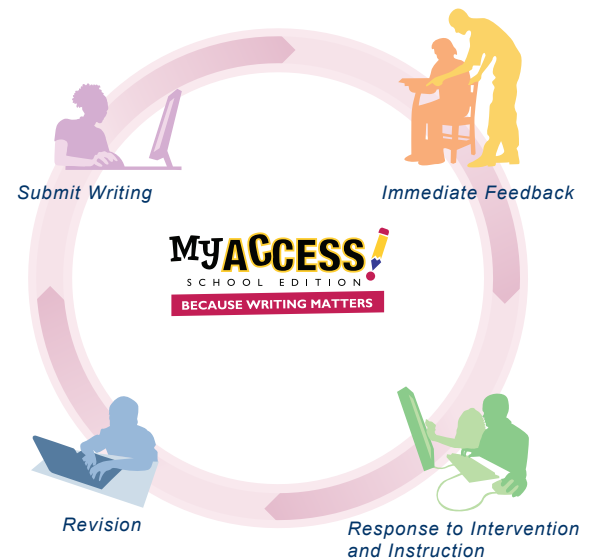

More Time Writing, Less Time Grading Papers

Gain additional time for individualized instruction in the classroom - Instead of spending their time grading papers, teachers can conduct curriculum planning, focus on teaching specific skills in areas that need improvement and help students polish their skills in areas where they are already doing well.

Provide more writing practice for students - It's simple: the more students write, the better writers they become. The more proficient students become at writing, the better they do academically across the curriculum and on high-stakes writing events such as state-mandated assessments, high school exit exams, and college admissions tests.

Assign writing tasks based on instructional needs - With over 1,300 cross-curricular writing topics (prompts), teachers won't have to struggle to think of ideas for assignments. Plus, prompts are aligned to state standards for authentic writing tasks that parallel state assessments, and many are based on popular textbooks used in class. Educators can even create their own prompts specific to their class, school or district.

Stay up-to-date on student progress - The comprehensive reporting function in MY Access! pinpoints areas in need of remediation, so teachers can conduct timely intervention and administrators can set benchmarks for academic achievement.

“ MY Access! complements our teachers' in-depth classroom instruction by giving them the tools they need to deliver immediate results to students. ”

- Dr. Ruth Forrester, Principal,
O.A.S.I.S. Academy, FL

Increase Student Achievement through Writing!

MY Access! improves student writing proficiency by encouraging students to revise their writing in response to immediate feedback. Submit student essays wirelessly from the NEO 2 laptop and receive immediate and accurate writing scores via MY Access!

Bring Excitement to Writing—and to Every Subject!

Now you can generate excitement for writing that other teachers can only dream about! NEO 2 makes writing easier and more enjoyable for your students, and makes managing the writing process a joy for you. As a result, your students will write more and become much more skilled and enthusiastic writers.

NEO 2 gives teachers and students a variety of new features that expand its use beyond writing and keyboarding into virtually any academic subject, including directly entering student essays into MY Access! and receiving instant and accurate holistic and domain score feedback!

Research proves that the more one writes, the better writer one becomes. Students using the NEO 2 in conjunction with MY Access!

have the best of both worlds! They can write and revise their writing as often as they'd like. With over 1,300 writing prompts for teachers to select for their students, including the most popular Accelerated Reader titles, the reading-writing connection becomes stronger. Students can take their AR quizzes and then have a meaningful writing topic about the book assigned for writing practice. They can edit their responses and receive instant, accurate feedback on the overall essay, on a 4 or 6-point scale.

Additionally, students will also receive score feedback on the following domains:

- Focus and Meaning
- Content and Development
- Organization
- Language, Use, and Style
- Mechanics and Conventions
