

# Navigating IntelliWriter™

## The Writing Window

The writing window functions similarly to any word processor (i.e. Microsoft word, google docs, etc.) You can use this window to immediately start writing your document in the white space and make use of the editorial tools in the top bar.

The screenshot shows the IntelliWriter writing window. At the top, there is a menu bar with 'File', 'Edit', 'Format', 'Tools', 'View', and 'Help'. Below the menu is a toolbar with various editing icons. A yellow box highlights the toolbar. The main writing area contains the text 'Start writing here'. The right sidebar features 'Writing Tools' including 'Writer's Guide', 'Cite.ai', 'lexipedia', and 'iseek.ai'.
