

IntelliWriter is added as an **External App** to your Canvas account.

1. Signed in as a Canvas Account Administrator, in the root Account click **Developer Keys** in the Account Menu and then click **+ Developer Key**. Select the **LTI Key** option.

2. Select Method: **Paste JSON**

3. Enter the following in the browser: <https://launch.intelliwriter.com/lti13/canvas/config.json>

4. Copy/paste the text into the **LTI Configuration box**

5. Enter a Key Name that provides context for administrators: **IntelliWriter Lti13**. Click **Save**

6. Record the number (**Client ID**) seen in the **Details** column of your new Developer Key entry.

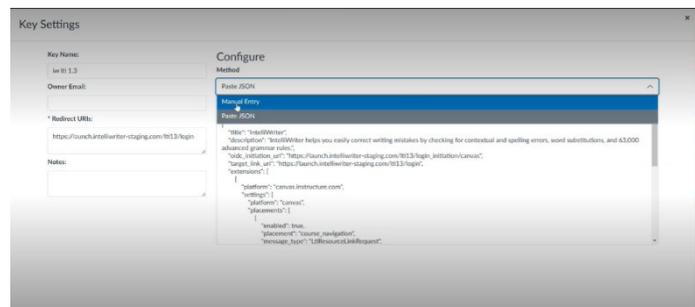

7. Change the **State** to “On.”

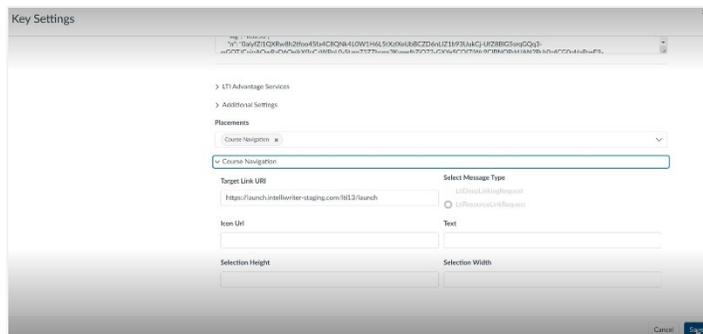

8. Email the **Client ID** and the **Show Key** value to support-intelliwriter@vantage.com . *Please note that IntelliWriter integration will not be complete and available to users until the IntelliWriter Team has configured your **Client ID**.*

9. **IMPORTANT**. Click on **EDIT** under **Actions**.

10. Change **Configure Method** to **Manual Entry**

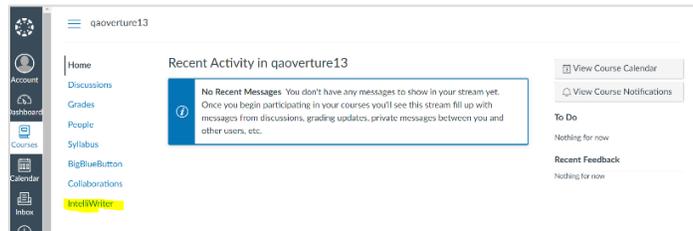

11. Scroll down and expand “**Course Navigation**.” Confirm and click in **SAVE**.

12. Navigate to the Course in which you would like to add IntelliWriter as a tool. Click the **Settings** link in the navigation menu. (You can also add IntelliWriter to *all courses* by navigating to the Account or Sub-Account and clicking the **Settings** link.)
13. Click the **Apps** tab.
14. Click the **Add App Configurations** button.
15. In the list of Apps, click the cog menu at the right of the row and select **Configuration Type**. Copy/Paste the **Client ID** value.

IntelliWriter will now show in your list of external applications. The IntelliWriter option will appear to students and faculty in the left-hand column for each course you have added it to.
